DAAD

The series **INTERNATIONAL DIALOGUE ON EDUCATION BERLIN** is a joint initiative of the British Council, the German Academic Exchange Service, the German-American Fulbright Commission, the Australian Group of Eight and the Canadian Bureau for International Education in Berlin. Through the contributions of international participants the series aims to enrich the debate on science, research and higher education policy in Germany, to place German perspectives in a global context and to learn from positive examples from other countries.

The seventh conference in the ID-E Berlin series will examine the challenges facing postdoctoral careers in global academia. A detailed understanding of the different systems and new developments will be elicited from participating speakers from Australia, Canada, Germany, the United Kingdom and the United States of America.

Participants must register in advance. The working language will be English.
